

Technical Bulletin – Extreme Clip Installation

ABOUT THIS BULLETIN

- Extreme Clips provide permanent and secure fixing of F-WAVE® REVIA® Synthetic Roofing Shingles.
- Available in black or brown, Extreme Clips may be used as an alternative to hand sealing of tabs.
- Install Extreme Clips on very steep roofs like turrets, mansard roofs, or where the roof is exposed to extreme conditions such as in hurricane zones or coastal areas.
- Extreme Clips are not designed for use with F-WAVE® REVIA® **XTM** Roofing Shingles.

STEP 1

- Insert clip into shingle keyway with the point of the clip facing up the roof. See **Figure 1**.

Inserte el clip en el chavetero de la teja con la punta del clip Mirando hacia la cima del techo. Consulte la **Figura 1**.

STEP 2

- Slide clip up the keyway carefully. Take care as forcing the clip can cause damage to clip or shingle. See **Figure 2**.

Empuje el clip hacia arriba del chavetero. Forzar el clip puede causar danos en el clip o en la teja. Consulte la **Figura 2**.

STEP 3

- Ensure clip is straight with the keyway. Once clip is in place, strike clip with hammer. See **Figure 3**.

Asegúrese de que el clip esté recto con el chavetero. Una vez que el clip esté en su lugar, golpéelo con un martillo. Consulte la **Figura 3**.

STEP 4

- Check the installation. Clip should be secure and laying flush with the tab. See **Figure 4**.

El clip debe estar asegurado y colocado al ras de la Esquina. Consulte la **Figura 4**.
